ARTICLES BY TITLE

INDEX TO VOLUME 47 JANUARY THROUGH DECEMBER, 1974

Acknowledgment 302
A compact graph theorem . . . . . *Moon Kim* 99
A counterexample in matrix analysis . . . . . *B. B. Winter* 152
A generalization of Eisenstein's criterion . . . . . *Howard Chao* 158
A geometrical interpretation of certain algebraic results . . . . . *Dan Pedoe* 278
A "good" generalization of the Euler-Fermat theorem . . . . . *Roger Osborn* 28
Almost congruent triangles . . . . . *R. T. Jones and B. B. Peterson* 180
A new property of the Bernoulli numbers . . . . . *Juan Valdez* 144
An extension of Brocard geometry . . . . . *Paul Sidenblad* 159
An identity for the sum of digits of integers in a given basis . . . . . *Jean-Loup Mauclaire* 225
An inequality for conditional distributions . . . . . *B. R. Johnson* 281
A non-truth-functional 3-valued logic . . . . . *John Grant* 221
A note on almost perfect numbers . . . . . *J. T. Cross* 230
A note on arithmetic progressions of length three . . . . . *R. E. Dressler* 31
A note on densities of order statistics . . . . . *G. G. Makowski* 100
A note on Mersenne numbers . . . . . *Steve Ligh and Larry Neal* 231
A note on the greatest integer function . . . . . *L. Carlitz* 274
Another Euclidean geometry . . . . . *T. P. Dence* 125
Area-diameter relations for two-dimensional lattices . . . . . *P. R. Scott* 218
A relationship between an integer and the one with the reversed order of digits . . . . . *D. R. Hickerson* 36
Are the twin circles of Archimedes really twins? . . . . . *Leon Bankoff* 214
A sufficient condition for n-short-connectedness . . . . . *Bruce Hedman* 156
A theorem on an inscribed triangle . . . . . *O. Bottema* 34
A two-move game . . . . . *B. L. Schwartz* 190
Cardan's formulas and biquadratic equations . . . . . *Roger Chalkley* 8
Completeness of the real numbers . . . . . *Casper Goffman* 1
Congruence properties of certain restricted partitions . . . . . *K. Thanigasalam* 154
Constellation Morley . . . . . *K. R. S. Sastry* 15
Contagious properties . . . . . *James Chew* 84
Geometric approximations for e . . . . . *J. D. Buckholtz* 138
Hair . . . . . *Katharine O'Brien* 149
Isolation, a game on a graph . . . . . *R. D. Ringeisen* 132
Mathematical social science — an early example 234
More progress to madness via "eight blocks" . . . . . *Andrew Sobczyk* 115
Multiple subdivisions of the plane . . . . . *G. C. Marley* 202
1975 subscription prices for MAA journa's 179
Note on a function similar to $n!$ . . . . . *Jean-Marie De Koninck* 226
Notes and comments 162
Notes and comments 234
Notice 179
On a fixed point theorem for compact metric spaces . . . . *D. G. Bennett and B. Fisher* 40
On Minkowski's theorem . . . . . *P. R. Scott* 277
On the existence of absolute primes . . . . . *T. N. Bhargava and P. H. Doyle* 233
